RELEVANT EXPERIENCE

Frontend Engineer @Doctor.com

September 2016 - December 2019 // Cupertino, CA & Remote

- > Worked with a team of two designers, three frontend, and two backend engineers to ship an enterprise React application for healthcare providers to manage their listings, reviews, appointments and other relevant information (Provider Admin).
- > Built and maintained the Provider Diagnostic Tool (PDT) as part of a four person frontend team; a React SPA that allows doctors to enter in their info, scan the web for relevant listings via a Node backend, and assess the accuracy of their reputation online.
- > Took the lead as the lone frontend engineer on Doctor.com's ReviewHub 2.0 project. Worked with just one backend engineer and one designer to ship an Angular 1.5 web app with full offline functionality designed for a touch screen chromebook.

Software Engineer Intern @Doctor.com

July 2016 - September 2016 // Mountain View, CA

- > Worked with a senior frontend engineer and designer to build and maintain Doctor.com's main site, including a landing page, promotional pages, healthcare provider/practice profiles as well as the doctor search module.
- > Was the sole frontend dev as part of a two man engineering team responsible for rebuilding and maintaining the Angular 1.x scheduling widget, redesigning several steps of the appointment booking flow in the process.

EDUCATION

University of California, Santa Cruz

August 2012 - May 2014

- > Bachelor of Arts in Politics Conc. in African and Middle Eastern Studies.

SKILLS

Programming Languages

JavaScript (ES6), TypeScript, HTML, CSS/Sass, PHP
